Screen Sharing Problem / Mac OS

Problem

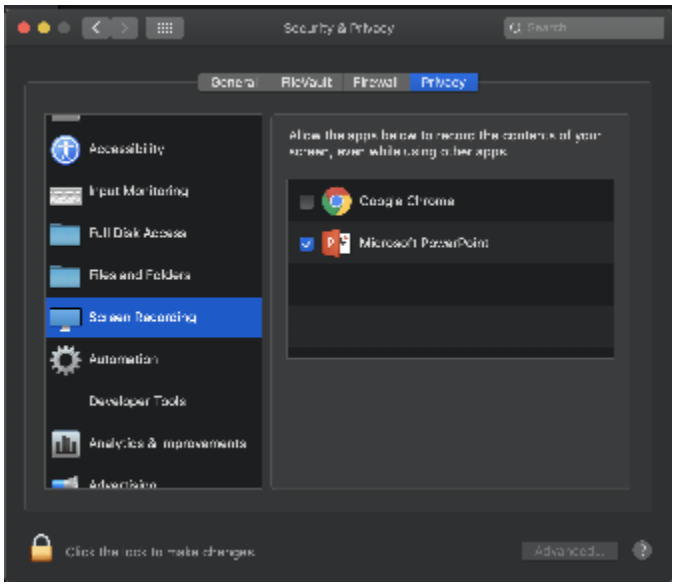
When I move to step 3, the "Screen Recording" step is not completed.

Solution

You need to authorize Google Chrome for desktop sharing on macOS.

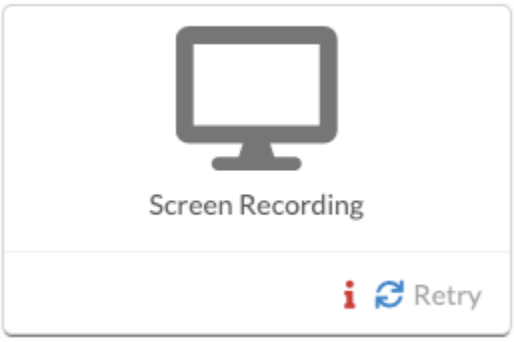
- Open System Preferences,
- Open Security & Privacy,

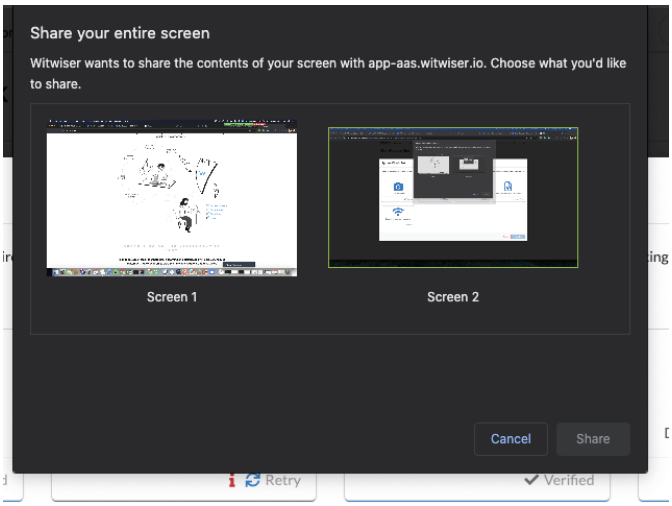
- Select the Privacy tab.
- Grant Chrome Chrome **for Screen Sharing**. After granting permission, Google Chrome needs to be restarted.



Problem

The screen sharing pop-up can not be seen.





Solution

1- The operating system may restrict screen sharing and warning pop-up could be kept on the background. Please check the security settings of your operating system.

2- It may be due to the Witwiser Chrome plugin. If the Witwiser Chrome plug-in was installed and deleted before starting the test, the exam page needs to be refreshed with ctrl + shift + R before starting the test.

3- If you click somewhere while the screen sharing pop-up is opening, screen sharing pop-up can move to the background. Please check the background and return it foreground. Then please approve for screen sharing.
